## Trade Proposal

This stat sheet has been automatically generated to give a quick overview of the players involved in the following trade:

- You send:
  1. DeMarco Murray, DAL
- You receive:
  1. Giovani Bernard, CIN
  2. Andre Ellington, ARI
  3. Jerick McKinnon, MIN

## Positional Stats

This table presents weekly averages from the season so far. Due to technical limitations, it currently does not include weeks in which a player did not play (due to injury or otherwise), but it does include games that players did not finish. This seems to be a good way to take nagging injuries into account while mostly ignoring those that take a player out for a limited number of weeks.

## Closing Argument

I think that you should do this trade because Player A is not helping your team by sitting on the bench. Meanwhile you have that real stinker of a WR Player B stuck in your Flex spot, whereas I could get value out of Player A, and send you Player C so that you don't have to start Player B.

That sounds like a win-win to me. Let me know what you think, and good luck this week against Other Owner.
